Deloitte

EXPERIENCE TRANSFORMATION 2024

A cityscape unified the experience and helped people navigate the space. It sparked ideas, such as a newsstand where people could download content, a bandstand bringing to life Deloitte's core services and a chocolate vending machine that rewarded participation. We worked with brand partners to bring additional audience value, for example, a serenity garden sponsored by Google Cloud.

EXPERIENCE TRANSFORMATION 2024

Google were the headline sponsor for the Deloitte event. As a brief they wanted their partner stand to be prominent in a busy space and be true to their brand. An activation was desired to bring a sense of a calm to the space for people to feel welcome and connect. The design incorporated raw materials to add authenticity to the space as well as bold contrasting colours - familiar Google characteristics.

EXPERIENCE TRANSFORMATION 2025

Google returned to EXT25 and wanted even more brand presence for this event. This meant upping the scale and creativity of the stand. Incorporating their new Google AI Branding, the design was packed with energy through the use of gradients and 3D Graphics.

Build what's next.

SPARK 2025

The brief - create a media-rich environment that would open new ways to share ideas in a live setting. This became the concept of 'tuned into change' whilst hosting the event in a TV studio.

The event identity and branding was tailored to this, using spotlight shapes and gradients to give the everything a media feel, from the digital content all the way through to environmental graphics.

J.P Morgan

INTERNATIONAL TRAINING MEETING

J.P Morgan wanted a fresh take on their usual annual training meeting. This meant a new location, Doha, as well as a new audience - bringing two divisions together. The event identity was inspired by the landmark of the Al Wahda arches which unite the city. These represented the connections to be made by both audiences and was incorporated at every moment from the plenary (featuring fishing nets) to the wayfinding.

Amazon

AMAZON HOUSE 2025

The event identity was simple - a celebration of fabrics. This became the core of the fluid design language, paired with a luxurious mediterranean colour palette of sage and terracotta. A digital invitation was created using AI where this fabric unravelled to reveal text behind.

My involvement ranged from the event identity all the way through to the dressing and decor of the evening gala dinner.

THE GREAT GRID UPGRADE

A smaller event to promote the launch of The Great Grid Upgrade in North London. Through the creation of the visual design system using the connection of shapes, I created a puzzle structure that signified growth and development. Each one of the staging shapes fit into one another to create one large piece to be mindful of sustainability in the sector.

SENIOR LEADERSHIP 2025

This senior leaders event was centered around the theme of focus. The visual identity was inspired by the four corners of a digital camera frame. This framing technique not only brought text and imagery into sharp focus but also highlighted the key topics and challenges the company would face in the coming year. The frame motif was integrated into video content, dynamically zooming in and out, and was also used to capture and emphasise the stunning landscapes.
